

Purple Classroom

In **Purple Classroom** we have areas where we can sit quietly to read, complete jigsaws or colour in, explore maths through hands on play and take part in fun learning activities.

We love to dance and sing, play musical instruments and have fun together. But most importantly, we celebrate who we are and show off our amazing work by exhibiting it on our very own displays.

Purple Classroom

In **Purple Classroom** we learn by.... fulfilling our sensory needs. We have sand to explore with our hands and our toes. We can dig, pour, build or sieve the sand using the tools available. The light up water tray provides a calm, soothing experience where we can learn through play. The sensory story table is built up around our weekly class story so we can use our senses to learn about the characters, the setting and the storyline. And for those times when we have a burst of energy, we can bounce spin roll and balance.
