

Outcomes:

#To look at our local area

#Consider the economic uses of Wisbech

#Look at the location of industries and consider why they are placed there

#Consider imports and exports from the town

Description of trip: our new topic is 'our local area'. We started the day in school discussing how countries perform economically – what do they import (buy in) and export (sell to others). Then we went out and about to discover what it is that the town of Wisbech imports and exports. The answers were surprising!! We first went to the 'Princes' canning factory, that we thought might can fish, but turns out it cans soup and vegetables. Then we took a drive down to the port and alongside all the timber merchants and factories. We parked the car to look at the port and walked round a timber yard. Then we drove to the other side of the river, where a train track had run alongside the river and warehouses.

After an exciting (not being ironic) and interesting morning, we adjourned to the Café Delish, where we enjoyed a delicious lunch, overlooking the wharves, before Nicki made us add up the cost of our meal and deduct it from the money we had

Quotes:

What a fun day!

Can I have the camera now?

I'm so full!
