

whinfell school see things differently

Curriculum Policy

Updated September 2024
Next review September 2025
By Deputy Head

Curriculum Policy Statement

This policy should be read in conjunction with the Cambian Whinfell School Vision and Mission Statements, the Statement of Purpose and the Autistic Spectrum Disorder policy which outlines the vision, aims, roles and responsibilities of the school. It also needs to be read in conjunction with individual subject policies, safeguarding, SMSC and assessment policies and in conjunction with the Whole School Literacy Policy.

Across the curriculum British Values are promoted and all individual policies and practice are such that they do not impede the Equalities Act 2010. Rights of protected groups as identified in the Equalities Act are duly recognised and catered for.

The Curriculum policy supports the framework of Cambian Whinfell as being a school for young people on the autistic spectrum who may have associated learning or emotional difficulties and who will benefit from the high level of support, the structure and the therapeutic milieu that we offer. The policy recognises the importance of Intent, Implementation and Impact as described in the Education Inspection Framework.

It actively promotes the principles of individual human worth, respecting diversity and encouraging the development of self-control. This policy supports a holistic approach, aiming to raise self-esteem, reduce anxieties, provide strategy for success.

We see the curriculum as a progression model which is continuously evolving and which is regularly subject to critical re-evaluation.

Curriculum intent

As a school we place great emphasis on preparing our young people for the challenges, opportunities and responsibilities inherent in taking as full a part as possible in wider society. Learning should be embedded, long-term and not held in isolation.

The curriculum at Whinfell School is designed to help each young person to achieve their full potential both **academically** and **socially**. Whinfell school believes that it has a dual-purpose role in not only helping young people to reach their academic potential but to also provide an education which will help develop their social skills, in particular their communication, interaction, social imagination and flexible thinking skills through a daytime and waking curriculum to support a greater level of independence and quality of life.

We aim to develop:

- Self-esteem, self-confidence and individuality
- Social interaction & communication skills
- Knowledge and understanding
- Understanding of their own learning styles, strengths and weaknesses using metacognition techniques
- A willingness to apply themselves to learning situations
- Self-motivation and the application of intellectual, physical and creative effort.
- A sense of enquiry and the ability to question and investigate through a range of means
- A love of learning and the ability to work independently
- Creativity, critical awareness and sensitivity
- The ability to work as a member of a team and to be a tolerant group member
- Strategies to be successful in society including organisational and transferrable skills
- Problem solving technique
- Tolerance of others, of their opinions, beliefs and cultures
- Self-control
- Literacy, numeracy and competence in the use of information technology
- Strengths, interests and skills relevant to adult life, employment and independence in a changing world
- Trust in themselves and others
- Appropriate moral and spiritual values
- An ability to recognise their own achievements as well as others in school and beyond
- Respect for fundamental British values of democracy, rule of law, individual liberty and mutual respect and tolerance of different faiths and beliefs
- Empathy skills
- Mental health resilience

Our aim is to provide:

- An environment designed to develop young people in a holistic fashion, improving their behaviour and attitudes, focussing on personal development and ensuring academic progress
- An Education that builds upon genuine learning with skills and knowledge that are retained, 'connected' and transferrable.
- Programs which are broad and balanced based on an appropriate key stage of the national curriculum that will challenge without raising anxiety
- Individualised learner pathways for each subject based upon learner profiles designed to recognise previous knowledge and skills, individuality in ability and learning style
- Content through a format which motivates and young people can access
- Learning experiences which work within each young person's zone of proximal development, providing whatever scaffolding is necessary for success and progression to occur and to gain accreditation to the highest level
- Opportunity to help develop relationships with adults and peers
- Opportunity to develop trust and confidence
- Community awareness and experience community life and projects
- Opportunity to learn and practice independent living skills
- Opportunities to gain accreditation and celebrate success
- A cross curricular approach wherever possible which is motivating and adds flexibility to be able to investigate areas of interest.
- Time to explore personal interests with a structured, holistic and multisensory approach
- Social, moral, spiritual and cultural themes which are investigated thoroughly through the day-time curriculum and further explored through the waking curriculum
- Opportunity to learn and practice skills to be able to gain and sustain employment
- Individual programs where possible, often delivered in a 1:1 setting, unless to encourage social skills and then may be delivered through group gatherings. Such group activities like our therapeutic outdoor learning program, morning and after school meetings still maintain individual support
- A therapeutic approach in delivery of the curriculum. Additional therapeutic input is dependent on need. We may offer hydrotherapy, or dance therapy, music therapy or therapeutic outdoor learning etc
- Therapeutic input tailored to individual needs through the Clinical Therapy Team (OT, SALT, EP, Psychiatry and CBT)
- Access to up-to-date, impartial careers guidance which enables pupils to make informed choices about a broad range of options and to fulfil their potential

We are committed to the principle that all of our young people regardless of ability, need, race or cultural background have a right to the highest quality of education and support we can provide.

We ensure:-

- An individual broad and balanced curriculum
- Appropriate levels of expectation and genuine challenge based on extensive individual assessment
- A flexible approach which aims to match teaching delivery to individual learning styles
- A holistic, therapeutic approach for maximum progression
- Relevance, continuity and progression in learning
- Opportunity for young people to progress in academic, personal and social domains
- Detailed Individual Development Plans (IDPs) are drawn up to meet Statement EHCP needs and which are reviewed and renewed termly.

By providing courses of study tailored to the needs, interests and aspirations of our young people through cross curricular, or topic based programmes and using a huge variety of teaching methods to suit individuals, students will be given the opportunity for making good progress. Many features of the curriculum are common to all students but the support and scaffolding is individual. None of our young people are denied access to any part of the curriculum on grounds of ability. The curriculum is intended to facilitate learning that is retained and can be applied across the web

Access

The principles above present us with a responsibility to find ways of ensuring that our young people are engaging in learning, motivated and able to succeed. Education staff are expected to ensure that young people who are having difficulty or becoming de-motivated are identified early and provided with appropriate support, encouragement and different teaching styles and work so that they may continue to participate at the most appropriate level for them. This may mean their curriculum design and plan is altered to enable them to be successful. Although we strive to engage our young people in their learning as much as possible, **we will always put their emotional state first as if this is not right, progress will be limited** and it would certainly not be conducive to reaching maximum potential. Our young people have the right to access a happy and positive experience in the learning environment and all staff at Cambian Whinfell are expected to provide an unconditional positive experience for every young person. Young people will access their curriculum by offering strategies and systems appropriate for each student.

Expectations of staff

Staff are expected to actively promote and seek to secure the curriculum aims and in particular to:

- Have high but realistic expectation of young people
- Have a flexible approach to teaching and a willingness and ability to match teaching methods to learning styles of each individual
- Respect our young people and their individuality and provide the necessary scaffolding to enable them to succeed
- Allow individual development plans (IDP) to support planning and drive education planning forward
- Follow the principles specified within our Autistic Spectrum Disorder policy to enhance practice
- Develop Individualised learner pathways and learner profiles for each student based and informed by previous assessment, previous knowledge and skills whilst recognising individuality in ability and learning style
- Recognise the of principles of meta-cognition and individual learning styles
- Demonstrate progression and continuity through planning, showing how the needs of young people are being addressed as well as the aspects of the national curriculum being covered
- Serve as good role models by endeavouring to be regarded as using appropriate social communication, humour, adopting empathic behaviour management and being fair and consistent in their approach. Education staff should endeavour to be seen to be sociable, using appropriate humour (excluding sarcasm), be polite and well mannered. Communicate effectively using methods which will enable young people to understand and respond
- Encourage, reward and value achievement and effort, both formally and informally through praise in the learning environment
- Provide work that meets needs and aspirations guided by a long term curriculum plan which offers both depth and challenge and which motivates and inspires the young people
- Work in partnership with authorities and parents/guardians, assess, record and report to create good relationships, from which the young people will indirectly benefit, in line with Whinfell procedure or authority/parent
- Involve the learner in the process of learning by discussing work, giving regular feedback through assessment and marking, negotiating targets and encouraging self-evaluation using after school get together meeting to allow the young person to celebrate their efforts and achievements
- Use assessment and reflection to inform future planning
- Contribute to placement plans and IDP targets on a monthly basis to help monitor the effectiveness of strategies and set appropriate and meaningful targets
- To work in partnership with other staff, parents/guardians, social workers, psychologists and Clinical Therapy Team (CTT) along with the wider community to achieve shared goals

- Keep parents/guardians, social workers/authorities fully informed about progress, achievements and concerns on a regular basis
- Contribute to review reports and IDP assessments on a half-termly basis
- Plan lessons which satisfy National Curriculum frameworks, are cross curricular and include computing, literacy (reading, writing and spelling) numeracy, social, moral, cultural and spiritual, personal and health education, and teach wherever possible using the suggested strategies outlined in the IDP. Teaching will have at its core the values of equality & diversity and fundamental British Values and prepare young people for the next stage.
- Provide the necessary support strategies and resources to allow our young people to access and contribute during communication.

Curriculum Implementation and Delivery

The school operates a nine teaching-period day, each session lasting 30 minutes. We have six teaching periods in the morning. This is broken up by a break of thirty minutes and a lunch period of one hour. There are a further three periods after lunch. We begin our day with a whole school morning meeting of approximately five minutes before beginning the basic skills or assembly, and at the end of the day we have a whole school reflection period which lasts approximately fifteen minutes.

On three days a week we have a 'basic skill' session which focus on individual numeracy, literacy and touch-typing and this is done with class tutors.

Assemblies occur once a week and themes are delivered which are often further worked on in class throughout the day. They provide opportunity to develop social skills as well as moral, spiritual, cultural, religious education, citizenship, PSHE (personal, social, health and economic education) which includes RSEMH (relationships and sex education and mental health) and fundamental British values.

Our after-school meeting includes all education and care staff on duty and is a time of reflection and celebration, but also provides opportunity for evening care staff to share each student's success plus an opportunity for them to get a feel for how their day has been, therefore being better prepared for the evening.

Once a week we hold a news quiz which lasts for 15 minutes. The news quiz:

- covers a wide range of subjects and connects to all areas of the curriculum
- builds language, vocabulary, critical thinking, problem solving, oral expression, and listening skills
- develops informed citizens and lifelong newsreaders. By studying current events it helps students understand the importance of people, events, and issues in the news; it stimulates students to explore and learn more about the news, and to pay attention to the news they see and hear outside of school

This means that total formal contact time is 31.5 hours per week, in-line with government recommendations for Key stage 4 and in excess of those for Key stage 3.

KS2 CURRICULUM INTENT

At Whinfell School it is our intent to provide each of our learners with a bespoke curriculum experience which is matched carefully to their academic, social, emotional, therapeutic and physical needs.

Using both prior data (numerical and observational), and our own baselining assessments, students will begin a highly personalised learning journey across a broad and balanced range of curriculum subjects.

Learners who are chronologically key stage two will be baselined and their curriculum matched to their individual need. Whilst this may match with the KS2 programme of study, but it may also be the case that in some subject areas that have significant gaps from KS1.

By providing courses of study tailored to the needs, interests and aspirations of our young people using a variety of teaching methods to suit individuals, students will be given the opportunity for making good progress. Many features of the curriculum are common to all students; but the support and scaffolding is individual. None of our young people are denied access to any part of the curriculum on grounds of ability. The curriculum is intended to facilitate learning that is retained; our curriculum design across all stages draws on a large evidence base ensuring a research based approach to curriculum for retained learning, through carefully spaced curriculum and through regular retrieval practice within lessons.

Due to the bespoke nature of the curriculum design for each of our students, it is important to recognise that not all of our students will be following the National Curriculum programme of study meant for their chronological age. Gaps in knowledge will be assessed upon arrival at the school and the individual will begin their personalised learning journey at their own starting point, wherever that may be. For these reason, terminology such as 'KS1' or 'KS2' will not feature on any documentation shared with the young people.

For learners that are identified to have significant gaps in the knowledge that should have been acquired across Key Stage one and/or two, or those who are chronologically KS2 and meeting age expected expectations, Whinfell School KS2 curriculum is intended and designed to cover the National Curriculum for England and Wales (2013).

At KS2 students will study (Implementation)

Mathematics

The foundation for the content laid out in the National Curriculum. Maths Blocks provide a wide spiral curriculum (Bruner), allowing children to revisit each topic within a fairly short time span. This ensures that confidence is boosted by regular encounters with a specific skill or concept. Our curriculum coverage in Maths is structured into blocks: each one is composed of a small number of units covering one or more related skills, developing procedural fluency and addressing misconceptions.

All staff are trained to understand Ruth Merttens' popular maths mastery training in order to develop a whole-school approach to teaching mastery.

English

Whinfell School provides full coverage of the English National Curriculum for those working on the KS2 Programme of study. Different aspects of the five curriculum areas:

1. Reading – word level,
2. Reading – comprehension,
3. Writing – transcription,
4. Writing – Composition
5. Vocabulary, Grammar and Punctuation

Our pedagogical approach integrates the teaching of these five areas.

Our English curriculum is structured into a number of blocks of learning to ensure students gaps in learning can accurately be addressed. A typical block incorporates comprehension, spelling and the teaching of grammar and punctuation, all stimulated by the same core text and all culminating in a piece of extended writing to consolidate learning.

Comprehension, including word reading and further in-depth comprehension activities, textual analysis and meaning making. Some blocks include a Group Reader in the resources. This helps ensure that reading is central to children's learning. This strand is further supported and consolidated via the schools reading programme, which should be considered alongside this policy.

Grammar and punctuation is delivered using a balance of explicit teaching, focused activities and the application of what has been learned in the meaningful context of children's own writing. Grammar is further supported via the schools reading programme.

Composition - the last unit in a block comprises an extended writing activity. It provides opportunities for children to secure the learning from the other units and gives a purpose to this learning by grounding it in written expression. Transcription skills such as handwriting and spelling are also covered.

No unit is completely 'pure'. There is a strong focus, but often other elements of English teaching are included. Our experience of English language is not 'pure', and the best learning happens when it is purposeful and in context. Teachers cover the curriculum by choosing the blocks, then selecting the units which address the specific needs and requirements of the children in their class.

Handwriting and Spelling

The National Curriculum specifies that primary school children should work towards mastering handwriting that is fluent, legible and, eventually, speedy. At Whinfell School, we baseline our students handwriting skills upon arrival at our school and use this as a basis to plan their individual handwriting journey where applicable.

There are specific targets set out in the national curriculum, which our students may not have fully achieved prior to their arrival at the school. The baseline test will assess handwriting to identify any gaps from the following National Curriculum guidance:

In Year 1, pupils should be taught to:

- Sit correctly at the table, holding a pencil comfortably and correctly.
- Begin to form lower case letters in the correct direction, starting and finishing in the right place.
- Form capital letters.
- Form the digits 0 to 9.
- Understand which letters belong to which handwriting 'family' (a group of letters that are formed in the same way).

In Year 2, pupils are expected to:

- Form lower case letters of the correct size, relative to one another.
- Start using some of the diagonal and horizontal strokes needed to join letters, and understand which letters are best left unjoined.
- Write capital letters and digits of the correct size, orientation and relationship to one another
- Use spacing between words that is appropriate for the size of the letters.

In Years 3 and 4, children should:

- Continue to develop their [joined-up handwriting](#).
- Increase the legibility, consistency and quality of their handwriting – for example, ensuring that downstrokes of letters are straight and parallel, not sloping.

In Years 5 and 6, children are taught to:

- Write with increasing legibility, fluency and speed.
- Choose which shape of a letter to use, and decide whether or not to join specific letters.
- Choose the writing implement that is best suited for a task.

Whinfell schools handwriting policy, which should be considered in conjunction with this document, outlines the ways in which we support our young people to achieve the above targets.

Spelling

Most people read words more accurately than they spell them. The younger pupils are, the truer this is. According to the National Curriculum (2013) By the end of year 1, pupils should be able to read a large number of different words that they have learnt, whether or not they have seen these words before. Spelling, however, is a very different matter. Once pupils have learnt more than one way of spelling particular sounds, choosing the right letter or letters depends on their either having

made a conscious effort to learn the words or having absorbed them less consciously through their reading. Younger pupils have not had enough time to learn or absorb the accurate spelling of all the words that they may want to write. Whinfell schools spelling policy, which should be considered in conjunction with this document, outlines the ways in which we support our young people to become confident and accurate in their spelling. This is further supported by our reading programme, through the word study strand.

Phonics

For those young people who have gaps in their phonetic knowledge, we follow a DfE approved 'Twinkl' phonics programme. All staff have been trained on the programme, regardless of whether or not they hold responsibility for delivering the programme, in order to ensure a whole school approach to supporting learners to achieve a good understanding of these essential building blocks for learning. By following one scheme as a whole school, we will be able to establish a progressive, consistent phonics curriculum where children will progress and succeed.

Twinkl Phonics is a fully comprehensive, synthetic phonics teaching programme. The scheme builds and develops the skills and understanding children need to become effective, independent readers and writers.

In addition to the Twinkl synthetic phonics programme, Whinfell school incorporate Lexia Powerup into the curriculum of all our learners. A key benefit of this programme is that it is able to support learners in the phonetic understanding in a way that is engaging and relevant for their age. Lexia Powerup allows for our older students to access phonics without relying on texts and resources which have no relevance to their interests. This programme is supported by research by the EEF, who found that Lexia Reading Core5® is currently used in over 3,000 schools in the UK. Previous research on Lexia in the US and UK found promising results. The trial evaluated the programme within the UK context, using outcomes that measure all-round reading ability. The evaluation also measured the individual skills that compose 'reading skills', which allows for comparison with previous studies and to identify any areas of strength or weakness in the programme in terms of enhancing children's reading development. The independent evaluation found that children offered Lexia made the equivalent of one additional months' progress in reading, on average, compared to other children over the course of 12 weeks. These results have a high security rating: four out of five on the EEF padlock scale. The evaluation also found that the programme had a positive effect on skills that are important for further literacy development ([Lexia Reading Core5® | EEF \(educationendowmentfoundation.org.uk\)](https://www.educationendowmentfoundation.org.uk))

More information about our Lexia provision can be found in our reading policy, which should be read in conjunction with this document.

Foundation Subjects are designed to incorporate the National Curriculum for England objectives in design and technology, art, history, geography, music, dance, science, PSHE, and PE. Each subject has outlined their approach to the KS2 curriculum, which are in line with the wider school curriculum aims.

Key Stage 3: Year 7, 8 and 9

Pupils study:

- English/Literacy
- Maths/Numeracy
- Science
- Humanities - geography, history, RE
- Art
- Arts Award
- Physical Education (which includes, therapeutic outdoor learning (TOL)
- Personal, Social, Health, Economic, Relationships, Sex Education, Mental Health
- Citizenship
- Modern Foreign Language (discrete lessons and through theme days)
- Computing
- D & T – Hospitality and Catering
- Work Related Learning (including work experience, community activities and enterprise)
- SMSC through morning meetings, humanities and citizenship
- Social Skills

As appropriate pupils may be entered for Entry Pathways, unit awards and entry level certificates and Functional Skills.

Time allocations vary from student to student depending on their needs.

Key Stage 4: Year 10 and 11

Pupils study:

At key stage 4, individuality is given considerable emphasis. Aspirations, strengths, needs and recent experience of education are carefully considered to develop a curriculum which will motivate, fulfil requirements and provide the necessary knowledge and skills to take them on to higher education, work and semi- or total independent living.

Beyond Cambian Whinfell each individual young person is provided with their individual options and their preferences are taken into consideration and discussed at the transitions review in year 9.

Our small class groups enable each student to follow their own pathway preferences and so 'traditional options' are not used universally. A 'tailor-made curriculum' for each student, with as much input from the student as possible is created. The content is dependent on ability, needs, aspirations, interests and requirements.

Subjects taught are:

English Language, Maths, Science, PE, DT (Hospitality and catering), International Computer Digital Literacy, Art, Geography, PSHE RSHE, Citizenship, Work Skills, Social Skills and TOL.

Students will be entered for courses at the appropriate level including GCSE, L2 BTEC, Entry Level Certificates and Functional Skills awards. Pupils also study Entry Pathways in 'Independent Living Skills' and 'Preparing for working life' where appropriate.

Pupils throughout the school also work towards the John Muir Awards through the TOL syllabus.

In addition to the above, we have excellent links with local employers and organisations who can provide the opportunity for students to gain valuable experience in the work place.

It is essential that students have a creative, broad and balanced curriculum which meets their needs and aspirations and does not over-burden them. The level to which each subject is studied will be dependent on ability which may also determine the amount of time allocated to the subject.

Key Stage 5 and beyond (16+ Years)

This will be dependent on needs, aspirations, ability and interests. Young people may enrol at a local college, be on-site educated at school, or indeed a mixture of the two. Post-16, young people will continue to receive education in accordance with their Study Program. In addition to specific subjects, all students follow work related and independent living/ life skills programmes. Where required, students will continue to study English and Maths. All studies will be challenged and accredited wherever possible. Each young person will have access to the gym, swimming pool and will be encouraged to do regular physical and outdoor activities.

Young people may attend college and follow level 1, 2 or 3 courses in subjects such as production, theatre, film and events, performing arts, music, motor vehicle mechanics, animal care, photography, Esports, engineering or digital technology depending on aspirations.

All young people will be encouraged and supported in work placements to help develop the necessary skills and experience to gain and maintain suitable employment for life beyond Whinfell.

We are extremely flexible as to what young people do and where needed, college placements will be supported, however **all young people** will be supported to improve their:

- Independent living skills
- Social communication skills
- Social interaction skills
- Mental Health resilience
- Life skills
- Work based skills
- Ability to plan and organise
- Basic numeracy and literacy is directed towards independent living and work. Where appropriate young people will work towards adult literacy and numeracy qualifications at either level I, II, III or functional skills.
- Work experience

We are able to offer A-Level studies in Art, Geography, Media Studies and English. Suitability for A-level studies is based upon the subject leader's knowledge of the young person's potential and their aptitude for the subject.

Curriculum Matters

We take individual learning styles into consideration and have found that maximum progress occurs when young people are educated in small groups of not more than three pupils. Some pupils will benefit from all or most of their lessons being 1:1 but the majority of students will benefit from the social interaction that comes from learning in well-structured small groups. This is especially so in English, art, citizenship, computing, music, PSHE RSHE, and MFL.

On occasions larger groups will come together, for example for morning meeting and reflection, news quiz, drama, speaking and listening and team sports.

To take account of these differences and the range of ability in classes, all staff have a responsibility, when planning work, to differentiate in order to meet the needs of all the young people. This will involve at different times adapting tasks, providing different resources, developing extension work, providing a variety of learning styles and environments, setting individual goals giving different levels of support and working to different levels of accreditation. Some pupils work best on long term projects whilst others prefer defined tasks, some respond well to oral work, while others prefer written or 'hands on work'. Some find communication difficult and may benefit from working through ICT while some learn best in the outdoor environment.

For example staff may need to consider if a student will benefit from work which is:-

Project based

Theme based

Discrete subject timetabled and taught

Student initiated

Enquiry based

Subject led i.e. work all done through IT or through an interest.

Any students attending a college course will be supported to whatever extent is agreed between college and school in the service agreement. It may be that they require full 1:1 support provided by Cambian Whinfell in order to be successful. It may be that distance support is required and this will be provided. Support may be required for accessing learning or social skills. In all cases staff will support young people to study independently to complete coursework and assignments.

Within lessons teachers will use the strategies highlighted in the IDP's for each student, which address the child's particular needs or impairments.

Young people learn best when they are enjoying their work and are interested. They then become motivated and engage in learning and hence our lead is often taken from the child, extended to meet the requirements of the national curriculum and IDPs.

Finding a balance as far as task length, number of tasks and how to break tasks up for each young person is essential. If not set correctly, anxiety levels will rise and progress will be minimal with students becoming demotivated. It is essential that the holistic needs of the young person are put first above any other teaching objective. **Our young people cannot learn if their anxieties are raised.**

It is also important that teachers build time into their planning to continue developing relationships, again vital for learning to take place here at Cambian Whinfell.

(it is recognised that there will be times when it is beneficial to stray from the lesson plan in order to address a deeper personal issue).

Social, Moral, Spiritual and Cultural Education (including ‘Britishness’ and ‘radicalisation’).

Elements of SMSC are delivered across the curriculum and within discrete lessons such as RE, citizenship and PSHE. Tolerance and harmony between cultural traditions is encouraged and promoted along with an appreciation and respect for both their own and other cultures. For example visits are made to church for Christmas service and to other religious institutions such as a local Buddhist temple. In addition morning meetings (which have a termly context) cover SMSC themes and make use of guest speakers such as local religious figures, the police, charity representatives and the local MP. Charity involvement is encouraged and pupils contribute to the Christmas Shoebox appeal, sports relief, bake for OAPs, collect for the food bank.

The school actively promotes fundamental British values of democracy, the rule of law, individual liberty, mutual respect and tolerance. This is done whenever the opportunity arises within lessons and in conversation with young people. A member of the police visits to discuss the ‘Prevent’ programme gives presentations on anti-extremism. We also visit council offices and the magistrates court and hold elections during ‘Democracy Week’. We have regular visitors (e.g. local MP) and go on school trips to museums and places of worship.

The Learning Environment

Cambian Whinfall School caters for young people with a range of needs and diagnoses. We believe that young people have preferred learning styles of which the learning environment is part. Observational assessment helps us to determine preferred learning environments for each young person and we attempt to deliver wherever it is safe and possible to do so. Each room is equipped to cater for most preferred learning environments, each have discussion areas, single desks with PC's and laptops, and carpeted area's for casual floor work.

We recognise that a lively, purposeful and structured learning environment is essential in promoting high standards and good working practises. Displays of the young people's work, stimulus materials and appropriate resources are very important in setting standards and raising expectations. The structure and organisation of the classroom is also an important factor in developing effective working methods and a positive ethos. It is expected that classrooms are orderly environments and offer a learning environment which every young person feels safe, secure and able to apply themselves and to ensure that adequate resources are provided and accessible, and that young people treat the learning environment with respect.

Schemes of work and lesson planning

Each subject leader is required to have schemes of work for all their courses / programmes related where appropriate to the national curriculum and examination board requirements. These schemes of work are followed by teachers and their delivery monitored by the Head of Education. Schemes of work set out how the content of the course is structured so that skills, knowledge and understanding are developed progressively and show how teaching is organised. All staff will use medium and short term planning of similar format. It is expected that planning takes place in sufficient detail to ensure that young people achieve high standards and are given the opportunity to achieve their potential. There should be a clearly identified learning outcome as the focus of every lesson and it must be clear that learning is ongoing and related to planning.

Teaching staff are not expected to complete lesson plans for every lesson but where they are, there should be a SMART learning outcome and plans should be informed by what went on in the previous lesson. They reflect the success in meeting the learning outcome and previous learning and assessment after the completion of each session. This is an agreed method of recording lessons and evaluating using this acquired knowledge to plan future lessons which will be progressive and appropriate.

Homework

Cambian Whinfall recognises the importance and value of homework as an extension of class work and a vehicle to practise skills, acquire new ones and develop good study habits.

Our young people are encouraged to complete work in-house, but this is not enforced. As self-esteem rises and our young people begin to feel successful in the learning environment, they will often request additional work or time in the classroom. This is both encouraged and practised. They are provided with a time slot of between 15.15 and 16.00, where staff are available for support. This is encouraged especially in Y11 and post-16.

We endeavour to provide a wealth of learning opportunity throughout the waking curriculum by tight communication between education and care. The evening and weekend activities often provide additional learning opportunities to provide a more enriched understanding. Meal times, evening activities and bed time provide a wealth of learning opportunity for our young people who have difficulties with communication, social interaction and social imagination.

Many of our strategies used in class for helping young people to re-tell stories or events are used by house staff. Where appropriate social stories help provide consistency in our approach as both education staff and residential staff use them with the young people. The therapy team inform our practise through regular weekly meetings which highlight strategies for individual boys.

Special Educational Needs

It is expected that all education staff plan, prepare and support each young person who attends Cambian Whinfell and to be able to access the curriculum, regardless of their ability or needs. All of our young people have special educational needs but are encouraged to become independent and to take responsibility within the school.

All of our young people are being continually assessed and sometimes with the aid of assessment carried out internally and / or externally by the Clinical Therapy Team and external specialists. Targets for the Individual Development Plan (IDP) are put forward and agreed during review meetings where parents / guardians, social services and educational authority representatives have an input. Strategies to help achieve these quantitative targets are developed and inform the whole waking curriculum. They are evaluated in lessons and the pupils are scored accordingly. This helps to give them ownership of their IDP's and helps staff track progress. It is an expectation of staff to address targets in the planning, delivery and evaluation stages of each lesson. It is the job of the Head of Education to gather sufficient information to be able to set, monitor, assess and set appropriate targets. Progress with targets is monitored in half-termly meetings and IDP's are updated on a termly basis as a joint staff effort, including residential staff input. Formal review meetings are held on an annual basis. Monthly meetings are held for education staff to monitor and review targets along with progress and a written report is kept.

Each young person has a named key worker who is there for the young person as an additional support.

Differentiation

An individual approach is taken to: planning, teaching style, resources, expectation and the curriculum offered. Differentiation in lessons is indicated in lesson plans and by deployment of learning support.

Curriculum impact and assessment framework

Assessment is continual but may vary in form. Teaching staff are expected to plan for assessment and to use data gained to inform future planning. Half-termly meetings are used to update, report and record how effective is the learning taking place and how well the strategies provided in the IDP's, are working. End of year assessments and mock exams prepare young people for sitting external examinations.

Data is used to action plan and inform individual programmes of study. It is not an end in itself but is used to improve the quality of education and identify areas for intervention.

Assessment is carried out by:

- Use of memory platforms

Monitoring and review of the curriculum

Monitoring of standards, systems, teaching and learning at Whinfell School is the responsibility of the Head of Education and the Principal and is supported by School Improvement Partners, Principals and Deputy Head's of other Cambian Schools/Colleges and their analysis and reports. Each subject has ongoing Quality Assurance throughout the year via learning walks, lesson observations, Head of Education and teacher meetings, work scrutiny and the student voice.
