

Outcomes:

- To Explore and learn.
- Behave well in public.
- To understand how apples are grown and appreciate the local environment.
- To learn to appreciate nature and our findings.

Description of trip: Today Flamingos visited Sandringham visitor centre. We had a lovely forest walk around the grounds following the blue trail, which is 2 miles long. We stopped at a viewing area and you could actually see the beach in the distance. We looped back around and played in the play area before lunch. We enjoyed sitting chatting and watching the many dogs going for a walk at Sandringham. We then got back in the van to go to the apple picking site. We discussed what the perfect apple was, so that we only picked the best apples. One field had Cox's apples, which are the ones for eating and the other field had Bramley apples. These are cooking apples. We got plenty of each. Our teacher treated us to a bottle of apple juice from the apples at Sandringham. When we got back to the classroom we tasted it. It was so sweet and flavoursome.

Quotes:

"CONKERS!!!"

"This tree is furry"

"Look at the view... I can see the beach"
